

# CONTENTS

**Preface** ..... xv

**Authors** ..... xvi

**Annotation** ..... xvii

**Some Notation and Remarks** ..... xviii

**Part I. Linear Equations With Two Independent Variables** ..... 1

**1. Equations Containing One Derivative** ..... 3

**2. Linear Equations of the Form  $f(x, y) \frac{\partial w}{\partial x} + g(x, y) \frac{\partial w}{\partial y} = 0$**  ..... 5

2.1. Preliminary Remarks ..... 5

    2.1.1. Solution Method ..... 5

    2.1.2. Cauchy Problem (Initial Value Problem) ..... 6

    2.1.3. Examples ..... 6

2.2. Equations Containing Power-Law Functions ..... 7

    2.2.1. Coefficients of Equations Are Linear in  $x$  and  $y$  ..... 7

    2.2.2. Coefficients of Equations Are Quadratic in  $x$  and  $y$  ..... 9

    2.2.3. Coefficients of Equations Contain Integer Powers of  $x$  and  $y$  ..... 12

    2.2.4. Coefficients of Equations Contain Fractional Powers ..... 13

    2.2.5. Coefficients of Equations Contain Arbitrary Powers of  $x$  and  $y$  ..... 14

2.3. Equations Containing Exponential Functions ..... 24

    2.3.1. Coefficients of Equations Contain Exponential Functions ..... 24

    2.3.2. Coefficients of Equations Contain Exponential and Power-Law Functions ..... 25

2.4. Equations Containing Hyperbolic Functions ..... 30

    2.4.1. Coefficients of Equations Contain Hyperbolic Sine ..... 30

    2.4.2. Coefficients of Equations Contain Hyperbolic Cosine ..... 30

    2.4.3. Coefficients of Equations Contain Hyperbolic Tangent ..... 31

    2.4.4. Coefficients of Equations Contain Hyperbolic Cotangent ..... 32

    2.4.5. Coefficients of Equations Contain Different Hyperbolic Functions ..... 33

2.5. Equations Containing Logarithmic Functions ..... 34

    2.5.1. Coefficients of Equations Contain Logarithmic Functions ..... 34

    2.5.2. Coefficients of Equations Contain Logarithmic and Power-Law Functions ..... 34

2.6. Equations Containing Trigonometric Functions ..... 37

    2.6.1. Coefficients of Equations Contain Sine ..... 37

    2.6.2. Coefficients of Equations Contain Cosine ..... 39

    2.6.3. Coefficients of Equations Contain Tangent ..... 40

    2.6.4. Coefficients of Equations Contain Cotangent ..... 42

    2.6.5. Coefficients of Equations Contain Different Trigonometric Functions ..... 43

2.7. Equations Containing Inverse Trigonometric Functions ..... 45

    2.7.1. Coefficients of Equations Contain Arcsine ..... 45

    2.7.2. Coefficients of Equations Contain Arccosine ..... 46

    2.7.3. Coefficients of Equations Contain Arctangent ..... 48

    2.7.4. Coefficients of Equations Contain Arccotangent ..... 49

2.8. Equations Containing Arbitrary Functions of $x$ .....	51
2.8.1. Equations Contain Arbitrary and Power-Law Functions .....	51
2.8.2. Equations Contain Arbitrary and Exponential Functions .....	53
2.8.3. Equations Contain Arbitrary and Hyperbolic Functions .....	54
2.8.4. Equations Contain Arbitrary and Logarithmic Functions .....	55
2.8.5. Equations Contain Arbitrary and Trigonometric Functions .....	55
2.8.6. Equations Contain Arbitrary Functions and Their Derivatives .....	56
2.9. Equations Containing Arbitrary Functions of Different Arguments .....	58
2.9.1. Equations Contain Arbitrary Functions of $x$ and Arbitrary Functions of $y$ .....	58
2.9.2. Equations Contain One Arbitrary Function of Complicated Argument .....	59
2.9.3. Equations Contain Several Arbitrary Functions .....	61
<b>3. Linear Equations of the Form <math>f(x, y)\frac{\partial w}{\partial x} + g(x, y)\frac{\partial w}{\partial y} = h(x, y)</math> .....</b>	<b>65</b>
3.1. Preliminary Remarks .....	65
3.1.1. Solution Methods .....	65
3.1.2. Cauchy Problem .....	66
3.1.3. Examples .....	67
3.2. Equations Containing Power-Law Functions .....	68
3.2.1. Coefficients of Equations Are Linear in $x$ and $y$ .....	68
3.2.2. Coefficients of Equations Are Quadratic in $x$ and $y$ .....	69
3.2.3. Coefficients of Equations Contain Other Power-Law Functions .....	70
3.2.4. Coefficients of Equations Contain Arbitrary Powers of $x$ and $y$ .....	70
3.3. Equations Containing Exponential Functions .....	72
3.3.1. Coefficients of Equations Contain Exponential Functions .....	72
3.3.2. Coefficients of Equations Contain Exponential and Power-Law Functions .....	73
3.4. Equations Containing Hyperbolic Functions .....	74
3.4.1. Coefficients of Equations Contain Hyperbolic Sine .....	74
3.4.2. Coefficients of Equations Contain Hyperbolic Cosine .....	75
3.4.3. Coefficients of Equations Contain Hyperbolic Tangent .....	76
3.4.4. Coefficients of Equations Contain Hyperbolic Cotangent .....	76
3.4.5. Coefficients of Equations Contain Different Hyperbolic Functions .....	77
3.5. Equations Containing Logarithmic Functions .....	77
3.5.1. Coefficients of Equations Contain Logarithmic Functions .....	77
3.5.2. Coefficients of Equations Contain Logarithmic and Power-Law Functions .....	78
3.6. Equations Containing Trigonometric Functions .....	79
3.6.1. Coefficients of Equations Contain Sine .....	79
3.6.2. Coefficients of Equations Contain Cosine .....	79
3.6.3. Coefficients of Equations Contain Tangent .....	80
3.6.4. Coefficients of Equations Contain Cotangent .....	80
3.6.5. Coefficients of Equations Contain Different Trigonometric Functions .....	81
3.7. Equations Containing Inverse Trigonometric Functions .....	82
3.7.1. Coefficients of Equations Contain Arcsine .....	82
3.7.2. Coefficients of Equations Contain Arccosine .....	83
3.7.3. Coefficients of Equations Contain Arctangent .....	83
3.7.4. Coefficients of Equations Contain Arccotangent .....	84
3.8. Equations Containing Arbitrary Functions .....	85
3.8.1. Coefficients of Equations Contain Arbitrary Functions of $x$ .....	85
3.8.2. Equations Contain Arbitrary Functions of $x$ and Arbitrary Functions of $y$ .....	87
3.8.3. Equations Contain Arbitrary Functions of Complicated Arguments .....	88
3.8.4. Equations Contain Arbitrary Functions of Two Variables .....	89

<b>4. Linear Equations of the Form <math>f(x, y) \frac{\partial w}{\partial x} + g(x, y) \frac{\partial w}{\partial y} = h(x, y)w</math> . . . . .</b>	<b>91</b>
4.1. Preliminary Remarks . . . . .	91
4.1.1. Solution Methods . . . . .	91
4.1.2. Examples . . . . .	92
4.2. Equations Containing Power-Law Functions . . . . .	93
4.2.1. Coefficients of Equations Are Linear in $x$ and $y$ . . . . .	93
4.2.2. Coefficients of Equations Are Quadratic in $x$ and $y$ . . . . .	94
4.2.3. Coefficients of Equations Contain Other Power-Law Functions . . . . .	95
4.2.4. Coefficients of Equations Contain Arbitrary Powers of $x$ and $y$ . . . . .	96
4.3. Equations Containing Exponential Functions . . . . .	97
4.3.1. Coefficients of Equations Contain Exponential Functions . . . . .	97
4.3.2. Coefficients of Equations Contain Exponential and Power-Law Functions . . . . .	98
4.4. Equations Containing Hyperbolic Functions . . . . .	99
4.4.1. Coefficients of Equations Contain Hyperbolic Sine . . . . .	99
4.4.2. Coefficients of Equations Contain Hyperbolic Cosine . . . . .	100
4.4.3. Coefficients of Equations Contain Hyperbolic Tangent . . . . .	100
4.4.4. Coefficients of Equations Contain Hyperbolic Cotangent . . . . .	101
4.4.5. Coefficients of Equations Contain Different Hyperbolic Functions . . . . .	102
4.5. Equations Containing Logarithmic Functions . . . . .	102
4.5.1. Coefficients of Equations Contain Logarithmic Functions . . . . .	102
4.5.2. Coefficients of Equations Contain Logarithmic and Power-Law Functions . . . . .	103
4.6. Equations Containing Trigonometric Functions . . . . .	104
4.6.1. Coefficients of Equations Contain Sine . . . . .	104
4.6.2. Coefficients of Equations Contain Cosine . . . . .	104
4.6.3. Coefficients of Equations Contain Tangent . . . . .	105
4.6.4. Coefficients of Equations Contain Cotangent . . . . .	106
4.6.5. Coefficients of Equations Contain Different Trigonometric Functions . . . . .	106
4.7. Equations Containing Inverse Trigonometric Functions . . . . .	107
4.7.1. Coefficients of Equations Contain Arcsine . . . . .	107
4.7.2. Coefficients of Equations Contain Arccosine . . . . .	108
4.7.3. Coefficients of Equations Contain Arctangent . . . . .	108
4.7.4. Coefficients of Equations Contain Arccotangent . . . . .	109
4.8. Equations Containing Arbitrary Functions . . . . .	109
4.8.1. Coefficients of Equations Contain Arbitrary Functions of $x$ . . . . .	109
4.8.2. Equations Contain Arbitrary Functions of $x$ and Arbitrary Functions of $y$ . . . . .	112
4.8.3. Equations Contain Arbitrary Functions of Complicated Arguments . . . . .	113
4.8.4. Equations Contain Arbitrary Functions of Two Variables . . . . .	114
<b>5. Linear Equations of the Form <math>f(x, y) \frac{\partial w}{\partial x} + g(x, y) \frac{\partial w}{\partial y} = h_1(x, y)w + h_0(x, y)</math> . . . . .</b>	<b>115</b>
5.1. Preliminary Remarks . . . . .	115
5.1.1. Solution Methods . . . . .	115
5.1.2. Examples . . . . .	116
5.2. Equations Containing Power-Law Functions . . . . .	117
5.2.1. Coefficients of Equations Are Linear in $x$ and $y$ . . . . .	117
5.2.2. Coefficients of Equations Are Quadratic in $x$ and $y$ . . . . .	118
5.2.3. Coefficients of Equations Contain Square Roots . . . . .	119
5.2.4. Coefficients of Equations Contain Arbitrary Powers of $x$ and $y$ . . . . .	120
5.3. Equations Containing Exponential Functions . . . . .	122
5.3.1. Coefficients of Equations Contain Exponential Functions . . . . .	122
5.3.2. Coefficients of Equations Contain Exponential and Power-Law Functions . . . . .	123

5.4. Equations Containing Hyperbolic Functions . . . . .	125
5.4.1. Coefficients of Equations Contain Hyperbolic Sine . . . . .	125
5.4.2. Coefficients of Equations Contain Hyperbolic Cosine . . . . .	125
5.4.3. Coefficients of Equations Contain Hyperbolic Tangent . . . . .	126
5.4.4. Coefficients of Equations Contain Hyperbolic Cotangent . . . . .	126
5.4.5. Coefficients of Equations Contain Different Hyperbolic Functions . . . . .	127
5.5. Equations Containing Logarithmic Functions . . . . .	127
5.5.1. Coefficients of Equations Contain Logarithmic Functions . . . . .	127
5.5.2. Coefficients of Equations Contain Logarithmic and Power-Law Functions . . . . .	128
5.6. Equations Containing Trigonometric Functions . . . . .	129
5.6.1. Coefficients of Equations Contain Sine . . . . .	129
5.6.2. Coefficients of Equations Contain Cosine . . . . .	130
5.6.3. Coefficients of Equations Contain Tangent . . . . .	130
5.6.4. Coefficients of Equations Contain Cotangent . . . . .	131
5.6.5. Coefficients of Equations Contain Different Trigonometric Functions . . . . .	132
5.7. Equations Containing Inverse Trigonometric Functions . . . . .	133
5.7.1. Coefficients of Equations Contain Arcsine . . . . .	133
5.7.2. Coefficients of Equations Contain Arccosine . . . . .	133
5.7.3. Coefficients of Equations Contain Arctangent . . . . .	134
5.7.4. Coefficients of Equations Contain Arccotangent . . . . .	134
5.8. Equations Containing Arbitrary Functions . . . . .	135
5.8.1. Coefficients of Equations Contain Arbitrary Functions of $x$ . . . . .	135
5.8.2. Equations Contain Arbitrary Functions of $x$ and Arbitrary Functions of $y$ . . . . .	137
5.8.3. Equations Contain Arbitrary Functions of Two Variables . . . . .	138
<b>Part II. Linear Equations With Three or More Independent Variables</b> . . . . .	<b>139</b>
<b>6. Linear Equations of the Form <math>f(x, y, z) \frac{\partial w}{\partial x} + g(x, y, z) \frac{\partial w}{\partial y} + h(x, y, z) \frac{\partial w}{\partial z} = 0</math></b> . . . . .	<b>141</b>
6.1. Preliminary Remarks . . . . .	141
6.1.1. Solution Methods . . . . .	141
6.1.2. Cauchy Problem (Initial Value Problem) . . . . .	142
6.1.3. Examples . . . . .	142
6.2. Equations Containing Power-Law Functions . . . . .	143
6.2.1. Coefficients of Equations Are Linear in $x$ , $y$ , and $z$ . . . . .	143
6.2.2. Coefficients of Equations Are Quadratic in $x$ , $y$ , and $z$ . . . . .	147
6.2.3. Coefficients of Equations Contain Other Powers of $x$ , $y$ , and $z$ . . . . .	150
6.2.4. Coefficients of Equations Contain Arbitrary Powers of $x$ , $y$ , and $z$ . . . . .	151
6.3. Equations Containing Exponential Functions . . . . .	154
6.3.1. Coefficients of Equations Contain Exponential Functions . . . . .	154
6.3.2. Coefficients of Equations Contain Exponential and Power-Law Functions . . . . .	155
6.4. Equations Containing Hyperbolic Functions . . . . .	157
6.4.1. Coefficients of Equations Contain Hyperbolic Sine . . . . .	157
6.4.2. Coefficients of Equations Contain Hyperbolic Cosine . . . . .	158
6.4.3. Coefficients of Equations Contain Hyperbolic Tangent . . . . .	159
6.4.4. Coefficients of Equations Contain Hyperbolic Cotangent . . . . .	159
6.4.5. Coefficients of Equations Contain Different Hyperbolic Functions . . . . .	160
6.5. Equations Containing Logarithmic Functions . . . . .	161
6.5.1. Coefficients of Equations Contain Logarithmic Functions . . . . .	161
6.5.2. Coefficients of Equations Contain Logarithmic and Power-Law Functions . . . . .	161

6.6. Equations Containing Trigonometric Functions .....	162
6.6.1. Coefficients of Equations Contain Sine .....	162
6.6.2. Coefficients of Equations Contain Cosine .....	162
6.6.3. Coefficients of Equations Contain Tangent .....	163
6.6.4. Coefficients of Equations Contain Cotangent .....	163
6.6.5. Coefficients of Equations Contain Different Trigonometric Functions .....	164
6.7. Equations Containing Inverse Trigonometric Functions .....	164
6.7.1. Coefficients of Equations Contain Arcsine .....	164
6.7.2. Coefficients of Equations Contain Arccosine .....	165
6.7.3. Coefficients of Equations Contain Arctangent .....	166
6.7.4. Coefficients of Equations Contain Arccotangent .....	166
6.8. Equations Containing Arbitrary Functions .....	167
6.8.1. Coefficients of Equations Contain Arbitrary Functions of $x$ .....	167
6.8.2. Coefficients of Equations Contain Arbitrary Functions of Different Variables ..	169
6.8.3. Coefficients of Equations Contain Arbitrary Functions of Two Variables .....	170
<b>7. Linear Equations of the Form <math>f_1 \frac{\partial w}{\partial x} + f_2 \frac{\partial w}{\partial y} + f_3 \frac{\partial w}{\partial z} = f_4</math>, <math>f_n = f_n(x, y, z)</math> .....</b>	<b>173</b>
7.1. Preliminary Remarks .....	173
7.1.1. Solution Methods .....	173
7.1.2. Examples .....	174
7.2. Equations Containing Power-Law Functions .....	175
7.2.1. Coefficients of Equations Are Linear in $x$ , $y$ , and $z$ .....	175
7.2.2. Coefficients of Equations Are Quadratic in $x$ , $y$ , and $z$ .....	176
7.2.3. Coefficients of Equations Contain Other Powers in $x$ , $y$ , and $z$ .....	177
7.2.4. Coefficients of Equations Contain Arbitrary Powers of $x$ , $y$ , and $z$ .....	178
7.3. Equations Containing Exponential Functions .....	180
7.3.1. Coefficients of Equations Contain Exponential Functions .....	180
7.3.2. Coefficients of Equations Contain Exponential and Power-Law Functions .....	181
7.4. Equations Containing Hyperbolic Functions .....	182
7.4.1. Coefficients of Equations Contain Hyperbolic Sine .....	182
7.4.2. Coefficients of Equations Contain Hyperbolic Cosine .....	183
7.4.3. Coefficients of Equations Contain Hyperbolic Tangent .....	184
7.4.4. Coefficients of Equations Contain Hyperbolic Cotangent .....	185
7.4.5. Coefficients of Equations Contain Different Hyperbolic Functions .....	186
7.5. Equations Containing Logarithmic Functions .....	186
7.5.1. Coefficients of Equations Contain Logarithmic Functions .....	186
7.5.2. Coefficients of Equations Contain Logarithmic and Power-Law Functions .....	187
7.6. Equations Containing Trigonometric Functions .....	187
7.6.1. Coefficients of Equations Contain Sine .....	187
7.6.2. Coefficients of Equations Contain Cosine .....	188
7.6.3. Coefficients of Equations Contain Tangent .....	189
7.6.4. Coefficients of Equations Contain Cotangent .....	190
7.6.5. Coefficients of Equations Contain Different Trigonometric Functions .....	190
7.7. Equations Containing Inverse Trigonometric Functions .....	191
7.7.1. Coefficients of Equations Contain Arcsine .....	191
7.7.2. Coefficients of Equations Contain Arccosine .....	192
7.7.3. Coefficients of Equations Contain Arctangent .....	192
7.7.4. Coefficients of Equations Contain Arccotangent .....	193

7.8. Equations Containing Arbitrary Functions	193
7.8.1. Coefficients of Equations Contain Arbitrary Functions of $x$	193
7.8.2. Coefficients of Equations Contain Arbitrary Functions of Different Variables	195
7.8.3. Coefficients of Equations Contain Arbitrary Functions of Two Variables	196
<b>8. Linear Equations of the Form <math>f_1 \frac{\partial w}{\partial x} + f_2 \frac{\partial w}{\partial y} + f_3 \frac{\partial w}{\partial z} = f_4 w</math>, <math>f_n = f_n(x, y, z)</math></b>	<b>199</b>
8.1. Preliminary Remarks	199
8.1.1. Solution Methods	199
8.1.2. Examples	200
8.2. Equations Containing Power-Law Functions	201
8.2.1. Coefficients of Equations Are Linear in $x$ , $y$ , and $z$	201
8.2.2. Coefficients of Equations Are Quadratic in $x$ , $y$ , and $z$	202
8.2.3. Coefficients of Equations Contain Other Powers of $x$ , $y$ , and $z$	203
8.2.4. Coefficients of Equations Contain Arbitrary Powers of $x$ , $y$ , and $z$	204
8.3. Equations Containing Exponential Functions	206
8.3.1. Coefficients of Equations Contain Exponential Functions	206
8.3.2. Coefficients of Equations Contain Exponential and Power-Law Functions	207
8.4. Equations Containing Hyperbolic Functions	208
8.4.1. Coefficients of Equations Contain Hyperbolic Sine	208
8.4.2. Coefficients of Equations Contain Hyperbolic Cosine	209
8.4.3. Coefficients of Equations Contain Hyperbolic Tangent	210
8.4.4. Coefficients of Equations Contain Hyperbolic Cotangent	211
8.4.5. Coefficients of Equations Contain Different Hyperbolic Functions	211
8.5. Equations Containing Logarithmic Functions	212
8.5.1. Coefficients of Equations Contain Logarithmic Functions	212
8.5.2. Coefficients of Equations Contain Logarithmic and Power-Law Functions	213
8.6. Equations Containing Trigonometric Functions	213
8.6.1. Coefficients of Equations Contain Sine	213
8.6.2. Coefficients of Equations Contain Cosine	214
8.6.3. Coefficients of Equations Contain Tangent	215
8.6.4. Coefficients of Equations Contain Cotangent	215
8.6.5. Coefficients of Equations Contain Different Trigonometric Functions	216
8.7. Equations Containing Inverse Trigonometric Functions	217
8.7.1. Coefficients of Equations Contain Arcsine	217
8.7.2. Coefficients of Equations Contain Arccosine	217
8.7.3. Coefficients of Equations Contain Arctangent	218
8.7.4. Coefficients of Equations Contain Arccotangent	218
8.8. Equations Containing Arbitrary Functions	219
8.8.1. Coefficients of Equations Contain Arbitrary Functions of $x$	219
8.8.2. Coefficients of Equations Contain Arbitrary Functions of Different Variables	221
8.8.3. Coefficients of Equations Contain Arbitrary Functions of Two Variables	222
<b>9. Linear Equations of the Form <math>f_1 \frac{\partial w}{\partial x} + f_2 \frac{\partial w}{\partial y} + f_3 \frac{\partial w}{\partial z} = f_4 w + f_5</math>, <math>f_n = f_n(x, y, z)</math></b>	<b>225</b>
9.1. Preliminary Remarks	225
9.1.1. Solution Methods	225
9.1.2. Examples	226
9.2. Equations Containing Power-Law Functions	226
9.2.1. Coefficients of Equations Are Linear in $x$ , $y$ , and $z$	226
9.2.2. Coefficients of Equations Are Quadratic in $x$ , $y$ , and $z$	228
9.2.3. Coefficients of Equations Contain Other Powers of $x$ , $y$ , and $z$	228
9.2.4. Coefficients of Equations Contain Arbitrary Powers of $x$ , $y$ , and $z$	229

9.3. Equations Containing Exponential Functions . . . . .	231
9.3.1. Coefficients of Equations Contain Exponential Functions . . . . .	231
9.3.2. Coefficients of Equations Contain Exponential and Power-Law Functions . . . . .	232
9.4. Equations Containing Hyperbolic Functions . . . . .	233
9.4.1. Coefficients of Equations Contain Hyperbolic Sine . . . . .	233
9.4.2. Coefficients of Equations Contain Hyperbolic Cosine . . . . .	234
9.4.3. Coefficients of Equations Contain Hyperbolic Tangent . . . . .	235
9.4.4. Coefficients of Equations Contain Hyperbolic Cotangent . . . . .	235
9.4.5. Coefficients of Equations Contain Different Hyperbolic Functions . . . . .	236
9.5. Equations Containing Logarithmic Functions . . . . .	237
9.5.1. Coefficients of Equations Contain Logarithmic Functions . . . . .	237
9.5.2. Coefficients of Equations Contain Logarithmic and Power-Law Functions . . . . .	237
9.6. Equations Containing Trigonometric Functions . . . . .	238
9.6.1. Coefficients of Equations Contain Sine . . . . .	238
9.6.2. Coefficients of Equations Contain Cosine . . . . .	239
9.6.3. Coefficients of Equations Contain Tangent . . . . .	240
9.6.4. Coefficients of Equations Contain Cotangent . . . . .	240
9.6.5. Coefficients of Equations Contain Different Trigonometric Functions . . . . .	241
9.7. Equations Containing Inverse Trigonometric Functions . . . . .	242
9.7.1. Coefficients of Equations Contain Arcsine . . . . .	242
9.7.2. Coefficients of Equations Contain Arccosine . . . . .	242
9.7.3. Coefficients of Equations Contain Arctangent . . . . .	243
9.7.4. Coefficients of Equations Contain Arccotangent . . . . .	243
9.8. Equations Containing Arbitrary Functions . . . . .	244
9.8.1. Coefficients of Equations Contain Arbitrary Functions of $x$ . . . . .	244
9.8.2. Coefficients of Equations Contain Arbitrary Functions of Different Variables . . . . .	245
9.8.3. Coefficients of Equations Contain Arbitrary Functions of Two Variables . . . . .	246
<b>10. Linear Equations With Four or More Independent Variables . . . . .</b>	<b>249</b>
10.1. Preliminary Remarks . . . . .	249
10.1.1. Linear Homogeneous Equations . . . . .	249
10.1.2. Linear Nonhomogeneous Equations . . . . .	250
10.2. Specific Equations . . . . .	251
10.2.1. Equations Containing Power-Law Functions . . . . .	251
10.2.2. Other Equations Containing Arbitrary Parameters . . . . .	254
10.2.3. Equations Containing Arbitrary Functions . . . . .	256
<b>Part III. Nonlinear Equations . . . . .</b>	<b>259</b>
<b>11. Quasilinear Equations of the Form <math>f(x, y) \frac{\partial w}{\partial x} + g(x, y) \frac{\partial w}{\partial y} = h(x, y, w)</math> . . . . .</b>	<b>261</b>
11.1. Preliminary Remarks . . . . .	261
11.1.1. Solution Methods . . . . .	261
11.1.2. Examples . . . . .	262
11.2. Equations Containing Arbitrary Parameters . . . . .	263
11.2.1. Coefficients of Equations Contain Power-Law Functions . . . . .	263
11.2.2. Coefficients of Equations Contain Exponential Functions . . . . .	264
11.2.3. Coefficients of Equations Contain Hyperbolic Functions . . . . .	266
11.2.4. Coefficients of Equations Contain Logarithmic Functions . . . . .	267
11.2.5. Coefficients of Equations Contain Trigonometric Functions . . . . .	268
11.3. Equations Containing Arbitrary Functions . . . . .	268
11.3.1. Equations Contain Arbitrary Functions of One Variable . . . . .	268
11.3.2. Equations Contain Arbitrary Functions of Two Variables . . . . .	271

<b>12. Quasilinear Equations of the Form <math>f(x, y, w)\frac{\partial w}{\partial x} + g(x, y, w)\frac{\partial w}{\partial y} = h(x, y, w)</math> . . .</b>	<b>273</b>
12.1. Preliminary Remarks . . . . .	273
12.1.1. Solution Methods . . . . .	273
12.1.2. Cauchy Problem. Existence and Uniqueness Theorem . . . . .	274
12.1.3. Equation $\frac{\partial w}{\partial x} + f(w)\frac{\partial w}{\partial y} = 0$ . Qualitative Features and Discontinuous Solutions . . . . .	276
12.1.4. Generalized Solutions of Quasilinear Equations . . . . .	286
12.2. Equations Containing Power-Law Functions . . . . .	290
12.2.1. Coefficients of Equations Are Linear in $w$ . . . . .	290
12.2.2. Coefficients of Equations Are Quadratic in $w$ . . . . .	293
12.2.3. Coefficients of Equations Contain Other Powers of $w$ . . . . .	295
12.3. Other Equations Containing Arbitrary Parameters . . . . .	297
12.3.1. Coefficients of Equations Contain Exponential Functions . . . . .	297
12.3.2. Coefficients of Equations Contain Hyperbolic Functions . . . . .	299
12.3.3. Coefficients of Equations Contain Logarithmic Functions . . . . .	302
12.3.4. Coefficients of Equations Contain Trigonometric Functions . . . . .	304
12.4. Equations Containing Arbitrary Functions . . . . .	306
12.4.1. Equations Contain Arbitrary Functions of Independent Variables . . . . .	306
12.4.2. Equations Contain Arbitrary Functions of the Unknown Variable . . . . .	310
12.4.3. Equations Contain Arbitrary Functions of Two Variables . . . . .	314
<b>13. Equations With Two Independent Variables Quadratic in Derivatives . . . . .</b>	<b>317</b>
13.1. Preliminary Remarks . . . . .	317
13.2. Equations Containing Arbitrary Parameters . . . . .	317
13.2.1. Equations of the Form $\frac{\partial w}{\partial x}\frac{\partial w}{\partial y} = f(x, y, w)$ . . . . .	317
13.2.2. Equations of the Form $f(x, y, w)\frac{\partial w}{\partial x}\frac{\partial w}{\partial y} + g(x, y, w)\frac{\partial w}{\partial x} = h(x, y, w)$ . . . . .	319
13.2.3. Equations of the Form $f(x, y, w)\frac{\partial w}{\partial x}\frac{\partial w}{\partial y} + g(x, y, w)\frac{\partial w}{\partial x} + h(x, y, w)\frac{\partial w}{\partial y} = s(x, y, w)$ . . . . .	321
13.2.4. Equations of the Form $\frac{\partial w}{\partial x} + f(x, y, w)\left(\frac{\partial w}{\partial y}\right)^2 = g(x, y, w)$ . . . . .	324
13.2.5. Equations of the Form $\frac{\partial w}{\partial x} + f(x, y, w)\left(\frac{\partial w}{\partial x}\right)^2 + g(x, y, w)\frac{\partial w}{\partial y} = h(x, y, w)$ . . . . .	331
13.2.6. Equations of the Form $f(x, y, w)\left(\frac{\partial w}{\partial x}\right)^2 + g(x, y, w)\left(\frac{\partial w}{\partial y}\right)^2 = h(x, y, w)$ . . . . .	335
13.2.7. Equations of the Form $f(x, y, w)\left(\frac{\partial w}{\partial x}\right)^2 + g(x, y, w)\frac{\partial w}{\partial x}\frac{\partial w}{\partial y} = h(x, y, w)$ . . . . .	340
13.2.8. Other Equations . . . . .	343
13.3. Equations Containing Arbitrary Functions . . . . .	347
13.3.1. Equations of the Form $\frac{\partial w}{\partial x}\frac{\partial w}{\partial y} = f(x, y, w)$ . . . . .	347
13.3.2. Equations of the Form $f(x, y, w)\frac{\partial w}{\partial x}\frac{\partial w}{\partial y} + g(x, y, w)\frac{\partial w}{\partial x} = h(x, y, w)$ . . . . .	349
13.3.3. Equations of the Form $f(x, y, w)\frac{\partial w}{\partial x} + g(x, y, w)\left(\frac{\partial w}{\partial y}\right)^2 = h(x, y, w)$ . . . . .	351
13.3.4. Equations of the Form $\frac{\partial w}{\partial x} + f(x, y, w)\left(\frac{\partial w}{\partial x}\right)^2 + g(x, y, w)\frac{\partial w}{\partial y} = h(x, y, w)$ . . . . .	356
13.3.5. Equations of the Form $f(x, y, w)\left(\frac{\partial w}{\partial x}\right)^2 + g(x, y, w)\left(\frac{\partial w}{\partial y}\right)^2 = h(x, y, w)$ . . . . .	359
13.3.6. Equations of the Form $\left(\frac{\partial w}{\partial x}\right)^2 + f(x, y, w)\frac{\partial w}{\partial x}\frac{\partial w}{\partial y} = g(x, y, w)$ . . . . .	361
13.3.7. Other Equations . . . . .	364
<b>14. Nonlinear Equations With Two Independent Variables of General Form . . . . .</b>	<b>367</b>
14.1. Preliminary Remarks . . . . .	367
14.1.1. Solution Methods . . . . .	367
14.1.2. Cauchy Problem. Existence and Uniqueness Theorem . . . . .	371
14.1.3. Generalized Viscosity Solutions and Their Applications . . . . .	374

14.2. Equations Containing Cubic Nonlinearities With Respect to Derivatives	378
14.2.1. Equations of the Form $\frac{\partial w}{\partial x} \left( \frac{\partial w}{\partial y} \right)^2 = f(x, y, w)$	378
14.2.2. Equations of the Form $f(x, y, w) \left( \frac{\partial w}{\partial x} \right)^3 + g(x, y, w) \frac{\partial w}{\partial y} = h(x, y, w)$	379
14.2.3. Equations of the Form $f(x, y, w) \left( \frac{\partial w}{\partial x} \right)^3 + g(x, y, w) \left( \frac{\partial w}{\partial y} \right)^2 = h(x, y, w)$	381
14.2.4. Equations of the Form $f(x, y, w) \left( \frac{\partial w}{\partial x} \right)^3 + g(x, y, w) \frac{\partial w}{\partial x} \frac{\partial w}{\partial y} = h(x, y, w)$	382
14.2.5. Other Equations	383
14.3. Nonlinear Equations Containing Arbitrary Parameters	385
14.3.1. Equations Contain the Fourth Powers of Derivatives	385
14.3.2. Equations Contain Derivatives in Radicands	387
14.3.3. Equations Contain Arbitrary Powers of Derivatives	387
14.3.4. More Complicated Equations	390
14.4. Equations Containing Arbitrary Functions of Independent Variables	392
14.4.1. Equations Contain One Arbitrary Power of Derivative	392
14.4.2. Equations Contain Two or Three Arbitrary Powers of Derivatives	395
14.5. Equations Containing Arbitrary Functions of Derivatives	397
14.5.1. Equations Contain Arbitrary Functions of One Variable	397
14.5.2. Equations Contain Arbitrary Functions of Two Variables	400
14.5.3. Equations Contain Arbitrary Functions of Three Variables	404
14.5.4. Equations Contain Arbitrary Functions of Four Variables	406
<b>15. Nonlinear Equations With Three or More Independent Variables</b>	<b>407</b>
15.1. Preliminary Remarks	407
15.1.1. Quasilinear Equations	407
15.1.2. Nonlinear Equations	409
15.1.3. Generalized Viscosity Solutions	416
15.2. Quasilinear Equations	418
15.2.1. Equations With Three Variables	418
15.2.2. Equations With Arbitrary Number of Variables	422
15.3. Nonlinear Equations With Three Variables Quadratic in Derivatives	424
15.3.1. Equations Contain Squares of One or Two Derivatives	424
15.3.2. Equations Contain Squares of Three Derivatives	429
15.3.3. Equations Contain Products of Derivatives With Respect to Different Variables	430
15.3.4. Equations Contain Squares and Products of Derivatives	432
15.4. Other Nonlinear Equations With Three Variables Containing Parameters	432
15.4.1. Equations Cubic in Derivatives	432
15.4.2. Equations Contain Roots and Moduli of Derivatives	433
15.4.3. Equations Contain Arbitrary Powers of Derivatives	434
15.5. Nonlinear Equations With Three Variables Containing Arbitrary Functions	437
15.5.1. Equations Quadratic in Derivatives	437
15.5.2. Equations With Power Nonlinearity in Derivatives	443
15.5.3. Equations With Arbitrary Dependence on Derivatives	445
15.5.4. Nonlinear Equations of General Form	446
15.6. Nonlinear Equations With Four Independent Variables	450
15.6.1. Equations Quadratic in Derivatives	450
15.6.2. Equations Contain Power-Law Functions of Derivatives	452
15.7. Nonlinear Equations With Arbitrary Number of Variables Containing Arbitrary Parameters	454
15.7.1. Equations Quadratic in Derivatives	454
15.7.2. Equations With Power-Law Nonlinearity in Derivatives	456
