

**23.**  $y(x) + y(a/x) = f(x)$ .

The right-hand side is assumed to satisfy the condition  $f(x) = f(a/x)$ .

Solution:

$$y(x) = \frac{1}{2} f(x) + \Phi(x, a/x),$$

where  $\Phi(x, z) = -\Phi(z, x)$  is any antisymmetric function of two arguments.
