

First-Order Partial Differential Equations > Linear Equations > Section 1.1

3. 
$$\frac{\partial w}{\partial x} + [f(x)e^{\lambda y} + g(x)] \frac{\partial w}{\partial y} = 0.$$

1°. Principal integral:  $\Xi = e^{-\lambda y} E + \lambda \int f(x) E dx$ , where  $E = \exp \left[ \lambda \int g(x) dx \right]$ .

2°. General solution:  $w = \Phi(\Xi)$ , where  $\Phi(\Xi)$  is an arbitrary function.
