

First-Order Partial Differential Equations > Linear Equations > Section 1.2

4. $a \frac{\partial w}{\partial x} + b \frac{\partial w}{\partial y} = f(x) + g(y).$

General solution:

$$w = \frac{1}{a} \int f(x) dx + \frac{1}{b} \int g(y) dy + \Phi(bx - ay),$$

where $\Phi(u)$ is an arbitrary function.
