

First-Order Partial Differential Equations > Linear Equations > Section 1.3

$$11. \quad f(x) \frac{\partial w}{\partial x} + g(y) \frac{\partial w}{\partial y} = h(x, y)w + r(x, y).$$

The transformation

$$\xi = \int \frac{dx}{f(x)}, \quad \eta = \int \frac{dy}{g(y)}$$

leads to an equation of the form 1.3.5 for $w = w(\xi, \eta)$.
