

First-Order Partial Differential Equations > Linear Equations > Section 1.3

$$12. \quad f(y) \frac{\partial w}{\partial x} + g(x) \frac{\partial w}{\partial y} = h(x, y)w + r(x, y).$$

The transformation

$$\xi = \int g(x) dx, \quad \eta = \int f(y) dy$$

leads to an equation of the form 1.3.5 for $w = w(\xi, \eta)$.
